September 5, 2002

I am very happy with the 2- line (28" x 8') Electronic Message Centers that I acquired from Signtronix. They have really made the public aware of where and what we are! We have been very successful with advertising fights and games that we show on our big screen TVs. We have many people coming in because of what we were advertidising. We have been very happy with our signs. Tythey are easy to program and we have had no problems. I would reccommed these message centers to anyone who want to attract a lot of attention to there business.

We noticed a 40% increase in business after we installed the signs.

Thanks Signtronix,
